

As child development specialists wisely observe, a child's work is to **PLAY** and the Children's Room is home to many opportunities to do just that!

### Our learning and play resources include:\*

- A play area for toddlers and preschoolers with an interactive build-out designed to be used as a store or puppet theater (or any other creative purpose), and rotating toys such as vehicles, puppets, light tables, blocks and other fine-motor learning toys.
- An AWE Early Literacy computer (with touch screen) with more than 70 learning games for preschool-grade 2, allowing children to dive into stories, music, drawing and art, geography, and science.
- Coding Toys, including Bee-Bots, Code-A-Pillars and Robot Mice.

\* Please note that due to COVID 19 restrictions, these resources will not be available until it has been deemed safe for children to once again play in close contact and share objects.
