

Projector FAQ

(Any question, please contact us at: drjprofessional@163.com)

Part 1:

4 Projection Methods: Depending on how you positioned the projector, you may need to change the projection mode so your images project correctly.

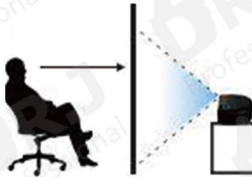

1.1 Factory defaults : Front lets you project from a table in front of the screen.

Front Projection

1.2 Rear : Flips the image horizontally to project from behind a translucent screen.

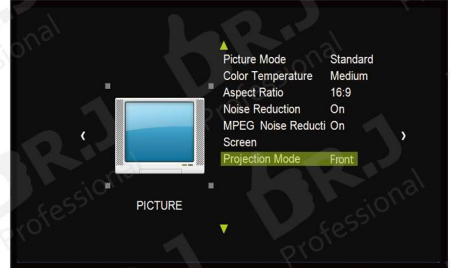

You can change the projection mode (Flip) using the remote control or by changing the Projection setting by Click MENU → SETTING → PICTURE → Projection Mode (Flip) like following pictures:

Part 2:

How to use HDMI cable display a computer / PS4/xbox /dvd image on projector?

2.1 Identifying available connections

The first step in connecting your computer to projector is finding an identical port on both machines. Once the matching port has been identified (one that is the same on both your input device and output device), you need the appropriate cable to connect them.

2.2 Please find following picture for your reference:
