

Product Features

- 3-in-1 function: soil moisture, pH and sunlight
- Premium double-needle detection technology
- Easy to use and no batteries needed
- Design to be lightweight and portable

Structure

How to Use

- Step 1: Switch to moisture / pH / light position according to demand
- Step 2: Insert the probe into the soil about 2-4 inches
- Step 3: Adjust the position of the probe until the pointer on the dial swing slightly
- Step 4: Check moisture / pH / light level in the dial after 10 min
- Step 5: Remove probe from soil and wipe clean after each use

Kindly Note

1. Do not force it into very hard soil or touch hard objects since it will be easy to damage the probe
2. Do not use it to test pure water or other liquids. It can only be used to measure soil
3. Do not leave the meter in the soil for a long time

4. Please wipe and clean the probe after each use
5. If the soil is too dry the indicator will not move, and water it before testing

Specifications

pH Range:

pH value of 3.5-8 (3.5-6.5=Acid, 7-8=Alkaline)

Moisture Range:

1-10 (1-3=Dry, 4-7=Nor, 8-10=Wet)

Relative Light: 0-2000 lux

(0-200=Low, 200-500=Low+, 500-1000=Nor, 1000-2000=High)

Product Size: 11.5x2.0x1.5 inches

Copper probe diameter: 0.2 inch

Aluminum probe diameter: 0.2 inch

Probe length: 7.9 inches

Distance between probes: 0.5 inch

Package Contents

- 1 x 3-in-1 Soil Tester
- 1 x User Manual

Warranty Policy

It will be out of guarantee if damaged due to incorrectly use or force majeure. Please feel free to contact us by support@sonkir-mail.com if you have any question. We definitely provide you 100% satisfactory solution.

Special Reminders:

1. Since soil most often is in/close to neutral state (with pH value of 7), it is highly likely that you find the needle in display window stay still (because the default pH value is set at somewhere between 7 and 8) when you use it to test the pH value of soil. Customers sometimes are misled by this appearance and hence regard the tester as a defective unit by mistake.

2. This soil tester is designed rigorously by professional engineers and it has been proved to be able to measure the soil moisture, soil pH value and illuminance level when it is used properly. Sometimes few customers claim that they find some/all of the functions (Moist/Light/pH modes) are not working, and it is very likely they have received a tester that was damaged in transit. This tester is composed of precision parts which are relatively vulnerable, and hence sometimes inevitably it is damaged during transportation. Please be reassured when you receive a defective product since we will take full responsibility for that, and the only thing you need to do is to contact us and we will send you a **NEW REPLACEMENT** for free after confirmation.

Plant Watering Guide

Red Zone Plants 1-3

Aloe
Anchor Plant
Asparagus Fern
Baby Jade
Baby Pine of China
Baby's Breath
Beaver Tail
Bishops Cap
Bloodleaf
Cactus
Chicken Gizzard
Christ Plant
Crassula
Crown of Thorns
Dumbcane
Easter Orchid
Euphorbia
Fig, Fiddle Leaf
Firecracker Plant
Flaming Sword
Floral Firecracker
Footproof Plant
Fuzzy Ears
Gas Plant
Geranium
Ghost Plant
Glory of Texas
